

Call for Consultancy Project Evaluation Expanding SAFE – Indonesia

BACKGROUND

Yayasan ADRA Indonesia is a humanitarian organization and belongs to the worldwide ADRA network, comprised of more than 120 supporting and implementing country offices. The mission of the agency is to serve humanity thus all may live as God intended. ADRA Indonesia aims to build a positive working environment through Justice, Compassion and Love as its main values. ADRA Indonesia has been working in Indonesia since 1981 and registered as a local Non-Governmental Organization (NGO) in 1991. ADRA's five core sectors include Disaster Risk Reduction and has more than 20 years of experience on disaster response across Indonesia.

Since August 2021, ADRA Indonesia has implementing Expanding SAFE project aims to provide technical support to earthquake survival in applying wire-mesh bandage ferrocement techniques in building/repairing their damaged house utilizing compensation funds from the government. Hundreds of masons, local labor, and government facilitators participate in on-the-job training and thus will contribute to accelerating the reconstruction process in Mamuju.

At the national level, the Expanding SAFE project is working with facilitators/coordinators of the sub-nationals of the Ministry of Public Work and Public Housing (PUPR) and local builders, to promote and applying wire-mesh bandage ferrocement technique to low-income households who are participating in renovation funds from the BSPS. The project target is the districts with a high number of low-income families living in areas prone to seismic hazards and tropical cyclone in Nusa Tenggara Timur.

PROJECT GOAL AND OUTCOMES

The overall goal of the Expanding SAFE project is to increase adoption of seismic friendly house in Indonesia for community resilience in facing potential earthquake

There are 2 outcomes of the project: (1) Number of affected families build/repair their damaged non-engineering house using wire-mesh bandage ferrocement, (2) Percentage of trained facilitators/coordinators of PUPR promote wire-mesh bandage ferrocement for house renovation

The purpose of this evaluation is to identify the extent of achievement of the project during the 17-months implementation. The evaluator will measure the performance and effectiveness of the project cycle, lesson learned and opportunities to scale up or replication of the project.

OBJECTIVE OF THE FINAL EVALUATION

This evaluation is part of the program for social betterment, social accountability and social inquiry. Project final evaluation specifically aims:

1. To visit project sites and to make interview project beneficiaries, project staff and other project stakeholders involved in the project to assess the project achievements.
2. To evaluate the relevance, efficiency and effectiveness of the project increasing community adoption of wire-mesh bandage ferrocement in retrofitting or house renovation
3. To provide a comprehensive and summary report of field findings with lessons, best practices, gaps and recommendation to enhance the quality of the next project.

METHODOLOGY

The evaluation will focus on qualitative assessments to provide a comprehensive context on the quantitative outcomes. The final evaluation including following activities: (1) Data collection through desk review and (2) Field data collection, including testimonies, life stories; (3) Data analysis and reporting, these activities should include feedbacks from the key stakeholders on initial findings.

TIMEFRAME

The evaluation activities should start in December 1, 2022 and the duration of project evaluation should not more than 2 months.

DELIVERABLES

In accordance with the final schedule of activities, the evaluator will prepare the report for submission to ADRA Indonesia. The report will provide:

1. A review and analysis of the project phases from its planning stages until completion and comparative explanation on stated project goal and outcomes with actual accomplishments, and examination of the reason for such performances.
2. Case studies and data on lessons learned and best practices arising out of the project.
3. Technical observation on the improved houses and how beneficiaries and key stakeholder were participate in the project.
4. Observations on the facilitating and constraining factors, as well as the relevant processes that took place, and recommendation how to address constraints and capitalize on strengths.
5. Observation on the appropriateness of strategies, approaches and adaptive project management to achieve objectives.
6. Observation of the government's readiness and capacity to take over of the project once ADRA Indonesia phase out.

The evaluator will provide one electronic draft evaluation report and photos for review and two original print-outs and electronic copies of the final evaluation report. The draft and final reports should be submitted in MS Word and not PDF.

Deadline to submit your full proposal is November 25, 2022. Only short listed of applicants will be invited for interview.

Please submit your proposal (along with CV and organization profile) by email to: recruitment@adraindonesia.org and mark your e-mail subject: "Expanding SAFE"
